- 🔧 **Construction Project Management**
- 🔧 **Quality, Safety, & Environmental Management**
- 🔧 **Storm & Emergency Response**

Knowledgeable Professionals

Empower Construction is a trusted and knowledgeable contractor that understands the nuances and challenges of the industry. With decades of combined experience, our team of innovative and diverse professionals can successfully complete even the most complex projects. Through continued training, we stay up-to-date with the latest technologies, regulations, and safe work practices.

From initial discussions through project completion, we specialize in managing all stages of a project's lifecycle. We understand each project is unique and have the vision to complete it safely, on schedule, and on budget. Our customers know they can rely on us to get the job done as we pave the path toward future successes.

Dedication to our Communities

Empower Construction is dedicated to the communities we live and work in. We know strong, safe communities start with sound infrastructure. Whether performing routine work or emergency response, we earn the trust of members of the community, ensuring they feel comfortable, positive, and relieved to know we are there to help. On every job and in every neighborhood we serve, we are committed to empowering utilities and people.

Partnerships

Keeping a consistent and open dialogue enables our clients to understand the process, challenges, and approach we take to address their specific needs. Empower Construction engages with clients, listening to feedback and encouraging a partnership that helps projects seamlessly progress. We prioritize these partnerships – whether with coworkers, clients, vendors, or our communities – and ensure information is accurately shared on a timely basis, leaving everyone feeling confident in a job well done.

Safety

At Empower Construction, safety is not just a word, a goal, or a mindful practice – it is our way of life. The safety and wellbeing of our employees is our primary responsibility because our most valuable assets are our people. Additionally, we conduct ourselves based on Lean principles to efficiently manage all aspects of our business and continually improve processes. We are committed to being the industry's go-to contractor through safe practices and effective leadership in all the markets we serve.

Distribution Capabilities

- Installation, construction, and maintenance of overhead and underground electrical distribution lines
- Circuit conversions
- Overhead and underground cable installation
- Pole replacement and relocations
- Circuit relocations for road-widening projects
- Fault locate and repair
- Distribution Hot Stick projects
- Make Ready work
- Directional drilling
- Distribution automation and switches

Substation Capabilities

- AIS and GIS substation projects
- Site preparation
- Foundation construction
- Structural steel erection
- Breakers, switches, and transformer installation
- Ground grid installation
- Buss installation
- Cable trenching
- Testing and commissioning
- Above- and below-grade raceway
- SCADA installation

Civil Capabilities

- Underground conduit/duct bank
- Manhole installation, repair, and rebuild
- Vault installation
- Concrete encasements
- Directional drilling
- Access roads and matting
- Sediment control
- Topsoil

Transmission

- Tower erection, exchange, and replacement
- Inspection, repair, maintenance, and relocation
- Barehand work
- Line reconductoring
- OPGW installation
- Matting and access

Project and Construction Management Capabilities

- Project Management Methodology implementation
- Design
- Estimating
- Scheduling
- Cost management
- Program management
- Quality management
- Safety management
- Environmental management
- Material procurement and management
- Tool procurement and management
- Administrative services
- Financial controller services

Emergency Response

- Restoration crews
- Storm resource management
- Damage assessment
- Material management
